

TASK		DONE CORRECTLY	NOT DONE CORRECTLY	NOT DONE
Team-centered care	Verbally assemble the necessary staff, equipment, and resources to care for a pediatric burn patient.			
	Demonstrate effective teamwork and communication (i.e. designate leader/roles, directed orders, closed-loop communication, sharing mental model).			
Family-centered care	Obtain an appropriate history from the family member (SAMPLE).			
	Address family concerns, update on care (translate medical aspects of care in plain language).			
	Involve social work for parental support early.			
Medical knowledge	Perform an efficient primary and secondary survey.			
	Prioritize early and efficient pain management, using intranasal fentanyl or intramuscular morphine, when no IV access has yet been established.			
	Calculate TBSA %			
	Appropriately estimate TBSA in a pediatric burn patient to guide fluid resuscitation and proper destination for transfer.			

Psychomotor	Demonstrate appropriate wound management (removing clothing/diaper, using dry, sterile dressings).			
Communication	Demonstrate handoff of care at the end of the case.
