

“No go” criteria for in-situ simulation

1. Decision by IMPACTS team that there is a safety issue
2. Decision of local leadership/charge nurse that clinical care would be adversely affected
3. Arrival of critical resuscitation that requires team members to stop case
4. Low staffing levels for unit
5. Minimum number of attendees are not present (requires at least 1 MD, 2 RN, 1 tech/ancillary at a minimum)
